

JOB DESCRIPTION

JOB TITLE	.NET Web Developer
MANAGER'S JOB TITLE	Managing Director
LOCATION	Styal, Manchester
POSITION STATUS	Permanent
SALARY	£ 25-35k (depending on experience)

Description:

Dolphin, one of the North West's leading digital creative agencies, are looking to recruit a .NET Developer. Established in 1998 you will be joining a fantastic creative digital agency that boasts Marshalls, Carphone Warehouse and GB Group among their impressive client list.

As a key member of the team you will be involved in working with multiple projects across a variety of leading clients.

We are looking for an ambitious and experienced web developer with experience of developing complex websites and applications.

We are looking for a developer who has ambition to work to a management role ultimately taking responsibility for technical services at the agency.

Specific responsibilities:

The successful candidate will have a strong list of live sites and urls they have worked on and will be able to demonstrate development experience on at least one of the following types of web applications

- CMS systems
- E-commerce sites.
- User generated content management and display
- Database driven websites.
- CRM systems (user registration / data capture)

Dolphin is an open environment with a commitment to use new technologies and to produce high quality, usable and accessible websites. The candidate will be working within a team of talented developers and designers will be able to work on their own initiative and have a passion for internet technologies.

Key Skills

- Web application development using C# .Net
- AJAX / javascript development
- SQL development and Relational Database Design
- Web Server / OS administration and configuration
- Object Orientated development and design experience
- XHTML, CSS

- XML, XSLT

Experience in the following areas would be preferred, but not essential

- Subversion
- Knowledge of javascript libraries including prototype, mootools etc.
- Flash Actionscript 2.0
- Mobile technologies

THE PERSON

Person Specification: *(outlines the type of skills/abilities and temperament of the post holder)*

Minimum Essential Requirements:

Ability to communicate effectively, using appropriate language and tools

The ability to produce test plans and scripts and to carry out comprehensive testing

The ability to produce, and deliver to, accurate estimates

Experience of operating within a formal Project Management framework

Experience of using version control procedures

Proven ability to problem-solve and fault find

Ability to work in an environment subject to continuous change

Proven ability to learn quickly

Ability to work constructively with 3rd parties

Ability to carry out in-depth research

Willingness to self teach and learn through methods other than formal training

Ability to communicate technical issues in a non-technical manner

Positive approach towards the acquisition of new technical skills

Positive approach to keeping self technically up to date

Aptitude for acquiring in-depth technical knowledge

Aptitude for acquiring in-depth business knowledge

Substantial record of success in developing and delivering business systems

Substantial record of success dealing with customers

The applicant should have a high level of enthusiasm and the ability to work under pressure to meet tight deadlines.

Experience/Qualifications

5 Years varied experience of working within IT with at least 3 years experience working on large web based projects. Preferred experience working for a digital agency.

Work Related Circumstances

The post holder must be flexible in working arrangements according to the demands of the position.
